ABOUT

I am a passionate aspiring software developer with a strong foundation in programming and problem-solving. Skilled in C++, JavaScript, and React, I enjoy building efficient and user-focused applications. I continuously work on improving my skills and exploring new technologies. I aim to contribute effectively to projects while growing as a developer.

CERTIFICATES

JPMorgan Chase & co	C++
Amazon DocumentDB	databricks ML
Github Copilot	

HACKATHON

1. Participated in Crafthon in Gujarat, where we built BehaveGuard, an AI-powered continuous authentication system. Developed real-time behavioral analysis with ML under tight deadlines.

Certificate
2. Participated in Parul Expo at Parul University, built a finance-based expense management platform. Implemented real-time tracking and insights under tight deadlines.

Certificate
3. Parul Uni. TechFest 2025

4. CodeMatrix Participation

5. CodeMatrix Excellence

6. IIT Bombay FinAgent

7. Build With Gemini

8. Dev Heat

9. Hack4Us

10. Axis Hackathon

11. Code2Debug

12. Code Contest

13. Brandathon

EDUCATION

Swaminarayan University, Kalol

Bachelor of Eng. in Computer

2025 – 2029

Vidhyadish Vidhyasankul School, Bhavnagar

Higher Secondary Education (75 %)

2023 – 2025

VidhyaDish Vidhyasankul School , Bhavnagar

School Secondary Education (73 %)

2022 – 2023

SKILLS

Languages & Frameworks: JavaScript (ES6+), C++, React.js, Tailwind CSS, HTML5, CSS3

Databases & Backend: MongoDB, Mongoose, REST APIs, Cloudinary, Node.js, Express.js

Tools & Platforms: Git, GitHub, Postman, npm, Vercel, Netlify, Render, Figma

UI/UX Design: Figma, Prototyping

PROJECTS

Behavior-Based Continuous Authentication Platform for Secure Banking

Overview: BehaveGuard is an AI-driven platform that continuously authenticates users using behavioral biometrics. It detects anomalies in real time and applies adaptive security measures while ensuring user privacy.

Technologies:Next.js, Tailwind CSS, Framer Motion, FastAPI (Python), Express.js, Node.js, MongoDB Atlas, Scikit-Learn, NumPy, Pandas, JWT

Links: Github | Demo

E-Learning Platform

Overview: Developed a web application for online learning with a user-friendly interface for students and instructors. Implemented features such as course management, and responsive design to enhance usability and performance. Optimized application performance and ensured seamless user experience through efficient backend integration

Technologies: HTML, CSS

Links: Github | Demo

Expense Management Platform

Overview:Developed a full-stack Expense Management Platform designed to simplify and automate the expense reimbursement process for organizations. The system allows employees to submit expense claims while enabling managers and administrators to review, approve, or reject requests through a structured multi-level approval workflow.

Technologies: HTML, CSS, JS, MongoDB
